As I mentioned in **my last post**, **Session Law 2010-67** (S887/H1426) requires the Department of Environment and Natural Resources (DENR) to develop a list of manufacturers who are in compliance with certain new requirements pertaining to recycling of used equipment and televisions and to post this list on the Department's website. The list is now available **here** (click on "List of Registered Manufacturers" on the left-hand side of the page).
